

Online Services

Corporate Television

PBMG has launched a number of corporate television systems around Australia, designed to deliver customised content to specific market verticals. These systems allow clients to schedule playback of a range of video-based material including internal communications and commercial promotions.

Web Development

PBMG produces high quality websites ranging from simple online brochures, to powerful database driven e-commerce sites, with experience in online payment systems and booking facilities, through to online shopping, product and services searches, forums, questionnaires, competitions and games, business-to-business and business-to-customer applications.

Web Streaming

AnnounceTV revolutionises the way companies communicate with their shareholders and the investment community, by facilitating communication of a wide range of messages through innovative internet broadcast technologies. AnnounceTV webcasts enable analysts to participate in briefings remotely, providing the opportunity to follow proceedings via video with synchronised slides, and to ask questions live over the web.

Interactive CDs

PBMG develops CD ROM-based applications ranging from highly customised sales and marketing presentations to extensive training applications, speaker-support material for corporate events, public facing touchscreen applications and low-cost brand promotion applications such as screensavers and desktop accessories.

Video Productions

PBMG has extensive experience with broadcast video productions, working with clients from initial concepts, scriptwriting and storyboarding, to filming, editing, animation and effects. Video is a dynamic and engaging medium, which is highly effective for sales and training purposes. Using in-house writers, film crews and edit facilities, PBMG delivers high-quality cost-effective video productions.

AV Edit Suites

PBMG offers online and offline editing in-house on dual Avid edit suites, with full audio and video effects capabilities and output to broadcast quality digital video decks.
